

# Central Sands Groundwater County Collaborative (CSGCC) Meeting

November 28, 2022 - 10:00 am

## Location:

**In-person at**  
**Hancock Agricultural Research Station**  
N3909 County Rd V  
Hancock, WI 54943

Or join via Zoom (online or by phone):

<https://uwmadison.zoom.us/j/97245039810?pwd=UGRIL1BHOGNDM0tXTHBrZWpaRHJCdz09>

Dial-in by phone: 312 626 6799

Meeting ID: 972 4503 9810

Passcode: 9241

One tap mobile:

+13126266799,,97245039810#

## Agenda

1. Call to order and attendance
2. Review and approval of prior meeting minutes
3. County groundwater updates - Conservation and Public Health (order JAWaWoPM)
4. Discussion of current research project:
  - a. Update on development of groundwater resource guide
  - b. Logistics and preparations for a roll-out event and communications
5. Brainstorming ideas about next steps, CGSCC initiatives
6. Possible symposium/panel discussion with various professionals
7. Consideration of options to raise and handle funds to support CSGCC's work.
8. Election of Officers
  - a. Chair
  - b. Vice-Chair
  - c. Secretary
9. Agenda items for next meeting. Date, Time, Location.
10. Adjourn

### **Stated Goals of this Collaborative (for reference):**

1. Understand current groundwater conditions by developing a sampling strategy to collect baseline water quality information across the Counties in the Central Sands Region. This information will be used to identify areas with elevated nitrate levels. In areas considered "hot spots", further analysis will be conducted to evaluate likely sources of nitrate contamination.
2. Gain a uniform understanding of methods to prevent nitrogen contamination in groundwater based on information from previous studies conducted in the central sands and similar settings.
3. Understand where areas most vulnerable to groundwater contamination exist to guide the development and use of ordinances, practices, and other preventative responses for land use.
4. Develop a unified regional outreach strategy to provide partisan-free education about groundwater conservation and water quality safety to the general public.
5. Create a model structure for regional collaboration on groundwater management that can be applied statewide.
