

All across Wisconsin,  
**childhood**  
**adversity**  
 is hiding in plain sight.

**Wood County Human Services,  
 in partnership with  
 Children's Hospital of WI and  
 Healthy People Wood County,  
 will be providing FREE ACEs  
 (Adverse Childhood Experiences)  
 Trainings to the communities of  
 Wood County.**

There are 10 Adverse Childhood Experiences (ACEs). The more ACEs an individual has, the higher their ACE Score and the greater their risk for long-term consequences. The prevalence of ACEs is staggering. Nearly every community feels the medical and social burdens of subsequent behavioral and physical health problems, including depression, suicide, heart disease, diabetes and early death.

**UPCOMING TRAINING OPPORTUNITIES**
